disclosed in document 1.

The invention set forth in claim 4 does not involve an inventive step in the light of document 2 and document 3 cited in the international search report. It would have been easy for a person skilled in the art to conceive of employing the technical feature that is disclosed in document 3, wherein a liner is provided to the surge tank in order to prevent the air intake surges that are generated on the downstream side of the surge tank from being transmitted to the upstream side of the surge tank, in the air intake device that is disclosed in document 2; providing an extension part to the collective tube; and attaching an air flow sensor to the extension part in question.
